Polkadot

# The Bounties BOOK

by Lily Mendz

**Transparency** is a fundamental pillar for building trust and strengthening engagement within **OpenGov**. During my participation in the ecosystem, I have identified a lack of centralized access to key information about approved **bounties** and **child bounties**. This information is crucial for those who wish to actively get involved and contribute meaningfully.

I have gathered and organized this data, making it available to the community for better use and distribution. My goal is to facilitate access to this information, helping more people make informed decisions and participate effectively in **OpenGov**.

# Polkadot Pioneers Prize, an Incentive Prize Program

**Proposer:** Parity

**Total DOT Claimed:** 147237

## Description:

The Polkadot Pioneers Prize encourages talented people to solve some of the biggest challenges facing Polkadot and Web3 and win up to 993,286.08 DOT in prizes. In this historic first, prizes will be funded in a completely decentralized way via Polkadot's on-chain Treasury.

## Polkadot Parachain Assets Onramp Bounty Program

**Proposer:** Zhixi Interlay

**Total DOT Claimed:** 14865

### Description

Interlay proposes a bounty program to fund the fiat on-ramp service for 20 parachains and the onramp integration for Asset Hub in the Polkadot ecosystem. The on-ramp service has been a prominent concern within the Polkadot and Kusama ecosystems, creating barriers to entry for new users. The proposal includes 15 assets on 14 parachains, notably including DOT and USDT on Statemint.

# Bounty Proposal for Public RPCs for Relay and System Chains

**Proposer:** Gustav

**Total DOT Claimed:** 20122

## Description

This proposal is about getting good and affordable RPC services for Polkadot and Kusama. RPC services are important for applications like Polkadot.JS and wallets to function well. The proposal suggests a transparent process for RPC providers to submit tenders, with defined standards of service. The providers will be evaluated by curators, who will ensure transparency and community involvement.

## Paseo - Developer Testnet Funding

**Proposer:** Birdo

**Total DOT Claimed:** 54258

### Description

A new testnet called Paseo has been launched in late 2023 for developers building in Polkadot. Paseo is seeking 125,018 DOT ($850,000) from the treasury to operate and run for 1 year (Jan 2024 to Dec 2024). The testnet will be managed by a dedicated group of ecosystem agents and will receive updates just before Polkadot, making it more stable than Westend and closer to Polkadot in terms of code.

## Games Bounty

Twitter

**Proposer: DotPlay (2)**

**Total DOT Claimed:** 1

### Description

1. The goal of this project is to encourage indie game developers to build games on Polkadot.
2. Unlike traditional startup funding, game development is more predictable and easier to assess the cost and ability of the team.
3. The games developed can be valuable to the ecosystem if they are integrated with the chain.

## Infrastructure Builders Program

GitHub

**Proposer:** Amforc

**Total DOT Claimed:** 148274

### Description

The IBP, a collective of independent infrastructure service providers, aims to become the main ecosystem RPC and 'IT department' by providing infrastructure related services to the Polkadot ecosystem and all parachains. The unique design of the IBP creates a globally distributed and resilient ecosystem service provider. By offering RPC services to parachain teams we want to make it more lucrative for new projects to build on Polkadot and existing teams to purely focus on building.
